Figure 1: Global distribution of research on the 'China Model' (2000-2023). The map shows a high density of research in North America (USA), Europe (UK, Germany, France), and East Asia (China). The color scale ranges from 0 to 100, indicating the number of studies conducted in each region.

The diagram illustrates the timeline of the 'SUPER' project. It features a central horizontal axis with several key dates and milestones marked. The timeline starts in 2024, with a specific date '11 6, 2024' noted. The project is labeled '“SUPER”' in the center. The timeline continues through 2024 and into 2025, with a final milestone marked '2.0'.
